

# IoT Based Automatic Plants Watering System

---

Presented by: Tiezheng Shao  
Yunshen Huang  
Jeong Min Lim

# Status report

---

# LIVE DEMO

---

# Future Work and Challenges

---

- Better approach to monitor the system
- Collect data and conduct experiments under various conditions
- Use the collected data to improve the health of the plant
  - personalize the humidity/sunlight level of user's plant
  - find an optimal schedule for the automated mode

# Q & A

---
